

Topic: RPC and RPCGEN

Read Chapters 20 through 23 of the textbook (Comer).

1. Write a complete **connection-oriented** client – server program using RPC that performs the file server functionality using different file sizes: 1 and 2 Kbytes.
2. Repeat step 1 for **connectionless** client-server RPC program.
3. The client should be able to store the requested file in any location in the client side.
